 - » Two 10-yard rolls of tulle, 6" wide
- **Deco Mesh**
 - » One 5-yard roll, 5" wide
- **18" Wire Wreath Foam**

RIBBON WREATH - 3 EASY STEPS

- **Step One: Cut Your Ribbon**

- » Start by cutting your ribbon into pieces, each about 8 – 10 inches in length

- **Step Two: Tie the Ribbon**

- » Begin by tying ribbon on the **outer ring** of the wire wreath form. You don't need fancy skills. Just a simple loose knot will do. Use one of your wider ribbons on the outer ring.
- » If supplied, you might consider using a solid colored transparent ribbon (*like tulle or deco mesh*), for this outer ring.
- » You should tie 15-20 pieces of ribbon per section to ensure you have good coverage of the wire frame when the wreath is complete.

- **Step Three: Move Inward**

- » Once you have completed the outer ring, move on to the second ring and begin the process again.
- » As you continue on into the inner ring, mix and match your ribbon to make your own unique creation!
